Score : _____

Date : _____

Find the Slope and Y-intercept for Each Equation

1) $-7x + 3y = 15$

slope = _____

y-intercept = _____

2) $3x + 2y = 12$

slope = _____

y-intercept = _____

3) $4x + 7y = -14$

slope = _____

y-intercept = _____

4) $3x + y = -12$

slope = _____

y-intercept = _____

5) $2x + 9y = 18$

slope = _____

y-intercept = _____

6) $-2x + y = -4$

slope = _____

y-intercept = _____

7) $-5x + 3y = -9$

slope = _____

y-intercept = _____

8) $-5x + 4y = -16$

slope = _____

y-intercept = _____

9) $x + y = 8$

slope = _____

y-intercept = _____

10) $x + 4y = 32$

slope = _____

y-intercept = _____
